Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 4,909,259 to Tehrani. Tehrani teaches an apparatus comprising a breath receiver in fluid communication with a subject (col. 4, lines 64-69), a capnographic breath analyzer 46 coupled to the breath receiver via line 60 which analyzes at least one breath of the subject for its CO₂ content and provides at least one output (col. 4, line 64-col. 5, line 3; col. 5, lines 19-29), a respiration diagnosis generator 32 (col. 5, line 61-col. 6, line 6), and at least one input 11, 50 receiving at least one non-respiratory measurement made on the subject (col. 5, lines 30-59). The respiration diagnosis generator provides an indication MRR (metabolic rate ratio) of the respiratory clinical state of the subject based on the at least one output and the at least one non-respiratory measurement. The non-respiratory measurement may be stroke volume, provided to input 50, or a pulse rate or ECG signal, provided at input 11.

Allowable Subject Matter

Claims 26-43 and 46 are allowed. The allowability of these claims was addressed in paper No. 6., filed 4/23/03.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
